BROOM STREET
SOFTWARE

With Statusbin, company reports and documents can be published to any employee or customer on their mobile device.

You can publish QAD ERP system reports as well as documents created in Word, Excel, PowerPoint, PDF and other formats. The Statusbin mobile APP allows employees to view the reports subscribed to them on their cell phones or tablets.

In addition to publishing reports you already have, Statusbin can be used to create new mobile analytic reports. Data from Excel or text files can be transformed into informative and interactive charts, graphs and tables.

Statusbin provides the mobile app, back-end platform and management tools to help you realize the power of mobile reporting within your company.

Report and Document Distribution

- Metrics on Departmental or Company Performance
- Salesperson Targets and Commission Reporting
- Updates on Order Bookings and Shipments
- Status on Factory Production
- Departmental Status Reporting to Management
- Weekly Expense Reporting
- Daily Financial Updates for Management
- Database Backup and System Log Files for Review by IT
- Company Shared Documents: Phone Lists, Holidays, Policies
- Training or Procedure Documents

Use your mobile device to see what's happening at work

Create Custom Mobile Reports

- A Developer toolkit allows any programmer (or non-programmer) to create attractive and interactive mobile reports using their existing skill set. No need to learn new and complex mobile technologies.
- The toolkit describes how to create simple text files containing data along with instructions for how the data should appear on the mobile device.
- Charts, graphs, tables and other data views will be rendered on the Statusbin app for iOS and Android devices according to your instructions.
- Alerts can be added to any report to notify mobile users of conditions which may require action.

Statusbin Product Comparison

Where other report distribution and mobile viewing solutions offer either document viewing or report creation from raw data, Statusbin offers both. It's this difference which sets it apart and allows you to unite all key reporting on your mobile device.

Statusbin values simplicity. We believe mobile reports should be clear and focused with the information you need directly visible and not buried within. In depth data analysis is not what most employees need to do on their phone or tablet.

Feature	Statusbin	Mobile BI	Cloud Storage	E-mail
View reports on a mobile device	Yes	Yes	Yes	Yes
View documents in original form (PDF, Word, Excel...)	Yes	No	Yes	Yes
