

"Sweeping Away The Competition..." iPhone/iPad[®] and Android[®] *"Mobile Trunk[™]"* App for QAD[®]

For healthcare suppliers, managing consigned inventory at provider sites and in the possession of field sales representatives is time-consuming, labor-intensive and costly. Much of the consigned order process requires manual tasks, such as submitting orders via phone and fax, manually counting inventory and engaging with customer service to help ensure products are available for clinicians when they need them.

With Mobile Trunk, a supplier can manage its consignment sales and inventory process. The real time access and visibility into product ordering and inventory management provided by Mobile Trunk help enable suppliers to stream line operations, reduce waste, better meet customer needs and comply with regulations.
